

The Biorenewable Deployment Consortium, LLC (BDC) is an international company dedicated to assisting the Forest Products Industry in utilizing leading-edge bioprocesses to achieve the highest value from their biomass streams.

BDC assists the Forest Products Industry by promoting the deployment of commercially viable advanced biofuels, biochemicals and byproducts technologies that do not require long term subsidy and by optimizing efficiency in order to get the most value from the tree. BDC brokers partnerships that will ultimately achieve the goal of deployment.

Value to Our Members

BDC is an organization focused on helping the pulp and paper industry deploy economic bio-based processes. They are a very reliable resource and provide quick responses to questions.

- Gopal Goyal, Manager, Retired Chief Scientist, International Paper

- Gain knowledge by attending our two annual forums that focus on commercial progress of new processes, economic drivers, success stories, policy, and tours of pertinent bioprocess facilities

“BDC is an intimate group of talented people.”

- Stacy Jordahl, Vice President, Ingevity

- Receive updates on technologies, processes, policies, and funding
- Receive help in commercializing technologies and finding strategic partners
- Receive individual assistance and strategic guidance regarding business plans
- Conduct preliminary due diligence on selected projects

Our participation in BDC gives us a wider view of the biorenewable field, allows us to add detail to our strategic energy plan, and helps us make sure we include all critical elements in our implementation strategy.

- Mark Daniel, Vice President Pulp and Power, Graphic Packaging International LLC

- Secure funding by capitalizing on our expertise, credibility, and past successes; we helped secure nearly \$140 million in federal funding for three of our members

BDC worked closely with us, as a growing Australian company, to do extensive due-diligence on our own proprietary Catalytic HydroThermal (Cat HTR) technology. BDC worked hard to help us develop our North American partnerships.

- Dr. Len Humphreys, CEO, Licella

- Access our key metrics for evaluating economic viability of projects
- Access peer-reviewed articles, white papers, documents, pertinent biorenewable industry news, videos, and the BDC series of highly rated, well attended, value adding webinars by Subject Matter Experts on both short-term and long-term opportunities for our members
- Guidance to BDC comes from the distinguished industrial leaders on our Advisory Board; the list of members can be found at: www.biorenewabledc.com

Membership

Contact us to Join BDC. Stay Abreast and Help Lead the Industry into the Future. Contact us at: info@biorenewabledc.com

- Our current membership/affiliations include major forest products industry companies, technology developers, service providers, biomass suppliers, universities, and federal agencies; international membership represents US, Europe, Canada, Australia, and Brazil.
- Approved annual membership is based on a company's annual revenue: \$10,000 if revenue is \$20 million or more or \$5,000 if revenue is less than \$20 million. Consultants or service providers with sales under \$1 million may join for \$2,500

I do believe BDC really is the best fact-based clearinghouse of technologies, particularly in light of key personnel coming from the business world.

- Dick Carmical, CEO, Price Companies
